INFORMATION PAPER

SUBJECT: USAMMA Publications

1. Purpose: To provide information on the various publications produced by the USAMMA Business Operations Directorate, Administrative Support Office (MCMR-MMB-A).

2. Facts:

- a. The Administrative Support Office, USAMMA, is responsible for the publication of the SB 8-75 Series publications, Supply Catalogs (SC 6545-8 and 5180-8 Series), and *The USAMMA Newsletter*.
- b. Supply Bulletins: On a monthly basis, the SB 8-75 series is produced. They are numbered consecutively, beginning in January with SB-S1. This series provides technical and medical supply information, as well as instructions to Department of the Army installations and activities. Specifically designated issues (SB 8-75-Sxx) are dedicated to a particular medical supply topic, such as Medical Maintenance, MTOE Book Sets, Army National Guard, or the Materiel Acquisition Information, i.e., MEDCASE, TARA, etc. Activities are responsible for electronically updating their own 12-series publications annually using DA Form 12. SB-8-75-S1 contains examples and instructions on how to complete the update.
- c. Supply Catalogs: The Materiel Acquisition Directorate, Unit Assemblage Branch, works with our Technical Editor to produce the Supply Catalogs (SCs). The SCs include DEPMEDS and non-DEPMEDS (Major) sets. The USAMMA does not print or mail the publications. Printing and mailing is completed under a printing contract through the U.S. Government Printing Office. The Technical Editor compiles, assembles, edits, and provides camera-ready copy to the printer. If you have any questions, please contact our Technical Editor at DSN 343-4313 or commercial 301-619-4313.
- d. **The USAMMA Newsletter**: The *Newsletter* is scheduled for quarterly publishing and contains articles on medical logistics relevant to both TDA medical activities and TOE medical units, as well as ongoing activities at the USAMMA. Activities/Units that interested in receiving the Newsletter should contact:
